The purpose of this guide is to support trainers in enabling learners to effectively assimilate and apply the accompanying material to a level acceptable to the industry. This guide is intended for the trainer with experience and skill in conducting group learning and who is a current content expert in the subject matter. It is recommended that the trainer become familiar with the content and layout of the companion resources. An understanding of the information as well as the process of implementing the content is fundamental to using this guide.

How to Use this Guide

Lessons are laid out in such a way that they may be changed and adapted to suit the participant group. Activities are intended to be suggestions rather than prescriptions. The Facilitation Strategies section gives suggested time frames for each activity. However, these time frames are flexible depending on the skill level, experiences, size, and composition of the group.

As information about human behavior changes regularly, the trainer should be prepared to acquire and include additional Canadian and provincial support materials, reports, resources and information when delivering this content. A commitment to lifelong learning and change is important because of the fluid nature of information and knowledge.

Facilitation Principles

A number of principles should be considered throughout the delivery of this material.

Continued Planning and Preparation

Planning and preparation are an essential part of instruction. The time required to plan and prepare should not be underestimated, particularly the time it takes for the material to be delivered. A trainer may choose to research and prepare other materials as a supplement to the course design and content.
Equal Importance of Content and Process

Content and process are equally important. The trainer should attend to group and team dynamics, issues arising, and individual needs that may require attention. The learning activities are based on a suggested agenda, so a trainer may adapt it according to participants’ needs. Participants need to feel they have been heard when they express issues of concern to them. Concurrently, the group and trainer need to modify their expectations or requirements as appropriate to the overall level of understanding and interaction of the group.

Balance within the Process

Attention to the process also means attention to the participants who dominate the group, and others who remain silent. The trainer should strive for balance in the level of participation among learners, encouraging quieter members to speak and politely telling more dominant members to give everyone a chance to speak. One technique that helps to achieve this balance is to ask various people to report back from small-group and team activities.

Encourage Participation

Experiential learning is one of the foundations of adult education. It has been proven to be a more effective method of mastering content than hearing a lecture, seeing a demonstration, or participating in a discussion. It is suggested that there be a balance of small-group and team activities, triads, pairs, and whole group work. Trainers should note that there will be times when a short lecture is necessary. Simulations through lab work and access to a reality environment are built into the curriculum.

Acknowledge Prior Learning

Participants come to the course with different knowledge, skills and needs. This should be acknowledged at the outset. The learning activities should facilitate ways for group members to learn from each other, as well as to learn from the trainer and the content. A good process rule is to move participants around so they work in small groups with different people. Mixing participants is also a good strategy for breaking up groups that may be stuck (too vocal or quiet).

Flexible Times

Flexibility is important. The trainer must be flexible in adapting time frames and content to the needs of the group. An activity that is given a suggested time frame of 30 minutes may take over an hour if the group finds the subject thought-provoking enough to discuss in more depth. The trainer must make some choices about time and adjust the agenda as necessary. At times the trainer should consult with the group in deciding how to proceed.

Make Time for Issues

There will be occasions when the group identifies a question or content area that seems important enough to address, explore or research in more detail. When this occurs, the trainer must try to address this need. One strategy is to gain cooperation from the group, and agreement that this information is a priority. Another strategy is to identify the issue as significant and agree to return to it at a later time.

Trainer Responsibility

The trainer must, however, maintain a certain degree of control and guidance over the group so that the learning outcomes are achieved. This means balancing the individual needs of group members with the overall structure and content of the curriculum and the overall needs of the group.

### Analyze Your Personal Strengths as a Tutor

#### Welcome – Level Three, Session One

Think of your strengths as a tutor and share this with another person.

- What do you do particularly well?
- What did you do that uses this strength?
- How did others help you?
- What are you most proud of in this strength?

Think of a time when you were particularly successful as a tutor. What was the best part of that experience?

Introduce presenters, agenda, and Learning Centres updates.

#### Welcome to Everyone

Build Tutoring Relationships Based on Trust and Expertise

Building Relationships

Three Principles for Success
1. Trust
2. Effective Communication
3. Empathy

Building Tutoring relationships with others can be complex.

Communication

Communication and Learning are interconnected.
The two key components of communication:
1. The content of the message
2. The emotional impact of the message on the receiver.

Describe how you connect with your Tutees when you are working with them.
Seek first to understand and then to be understood.

What strategies do you use to ensure that you understand what your Tutee and others are saying?

Analyze Difficult Tutoring Situations

Case Study Activity:
1. Brainstorm a variety of real ongoing difficult tutoring situations.
2. Pick a theme that resonates and form groups of three to four around that theme.
3. Create a case study of an ongoing tutoring situation in your theme area.
4. Give a short presentation on your case study to the larger group.

Welcome Back – Level Three, Session Two

Let's Review...

What I've Learned by Tutoring
1. Describe the approaches you take to setting goals – for yourself and for your tutoring sessions.
2. In what ways do you model effective study skills and student behaviours for your tutees?
3. What are some of your strengths as a Tutor?
4. Explain a few of the most significant things you have learned from your tutoring experiences? Why are these significant for you?

Reflection Time

- Write a reflection paper on your observations about your tutoring. You will start this process with an Outline.
- What are your strengths, concerns, weaknesses, and areas for future growth?
- Discuss reflections with your Tutor Supervisor.

10/28/2014
Consider Portfolio Thinking

**Folio Thinking**

is characterized by a personal awareness of one’s own contribution, value, and responsibility.

It requires individualized thinking, context-creating communication infrastructure and may use technology-based knowledge management.

---

**Portfolio Development**

A portfolio is a Reflective Journal of your progress as a Tutor that includes:

- Statements of your Intent as a Tutor
- Artifact of your Tutoring Skills
- Ways that you have made changes to Adapt

All held together with a narrative of your journey.

Your Tutor Journal Entries are a great place to start on this process.

End of Level Three Classroom Tutor Training

Thank You for Participating!
Finishing your Training

This concludes the first part of the Kwantlen Level Three Tutor Training program. You will continue your training under the guidance of your Instructional Associate, Learning Strategists, and faculty mentors.

Good Luck in all your future Tutoring activities.

Level Three integration exercises using online resources (6 hours)

Congratulations on finishing your Level Three Tutor Training! You now have more information to build on your Level One and Two tutoring concepts, experience, and situations that you encounter as a Tutor. You began with your application and interview to become a Tutor at Kwantlen’s Learning Centres, completed your six hour training session, including your workbook exercises, explanations, and discussions. The process that you will now follow in your tutoring will help you continue to help others. You will continue using Moodle for exercises and documents as well as working with your Instructional Associate, other members of the Learning Centre Team, and your Faculty mentor.

Accessing Moodle

Moodle is an online web based application that allows for interaction among students and instructors. We use it for tutor training as well as for communicating with each other. Because we consider this an important part of your job in the Learning Centre, you will need to log in each week to keep up on Moodle postings and discussion groups.

https://courses.kpu.ca/

You will see the following screen:

log in, and click on Tutor Training.

Choose the Tutor Integration tab and click into Level Three.
# KPU Tutor Level Three Training Process Log

This is a checklist that you can refer to for the major steps along the way as you complete the steps to obtain your Level Three certification.
